EARTHSCAPE

VIDEO MANAGEMENT FOR LAW ENFORCEMENT

Earthscape is a cloud-based video management tool that gives you powerful control over the video you capture - in the air, from the dash, or with body-cameras. Upload, share, review and manage tags, clipmarks, and view metadata for any video. See all videos that took place in a certain area during a certain time, find videos with key search terms and much more!

- Store all of your videos in a single, secure location.
- Sort, search, and catalog clips based on keyword, geographic area, or tags.
- CJIS-compliant cloud-based hosting means you can securely access your video data from anywhere.
- View camera position, speed, elevation, and more.
- Run reports to highlight crime scenes, critical infrastructure, or other areas of concern

LIVESTREAM YOUR VIDEOS WITH EASE

Earthscope's proprietary technology enables video to be live streamed from an aircraft over a cellular data connection. Agencies can securely access real-time aerial video from any web-based device and grant security access to other departments during multi-agency responses. Additional features include replay option of previously live-streamed videos, full screen viewing on smartphones or tablets and real-time streaming notifications.

Map Display
Configurable, shows aircraft flight path, camera path, and camera FOV footprint

Timeline
Zoomable to precisely identify an event's start or end time

Video Playback
Video is fully in sync with Earthscope's metadata, timeline display, graphs, & paths

Metadata
Shows aircraft & camera info synced with video

Clipmarks
Easily identify key events or areas of interest

UNRIVALED CUSTOMER SERVICE INCLUDES

- 1-year money-back guarantee
- Hosting plans customized for your specific data storage needs
- Free technical support and updates
